

Women and girls are disproportionately impacted by climate change.

## Why is Climate Change a gender equality issue?

Carole Theobald,

Zonta International Chair, Zonta Says NOW Working Group

Wednesday 23 November at 7.00 pm on Zoom

Carole Theobald has been a Zontian for 23 years and leads a Government team to reduce greenhouse gas emissions in Western Australia. When she realised the impacts that climate change has on women and girls, she just had to do something – and Zonta Says NOW is the result. In this presentation, she will:

- explain how climate change magnifies existing inequalities
- show why urgent action is needed and
- provide examples and tools to inspire you to take action.

Through Zonta Says NOW, we can build a better world for women and girls.
